WebLayers Achieves "Ready for IBM Rational Software" Validati

CAMBRIDGE, MA--(Marketwire - Jun 6, 2011) - WebLayers, a leading provider of [automated governan](#) software and solutions, today announced that it has successfully completed "Ready for IBM Rational Software" technical validation for Rational Team Concert (RTC) 3.0.1. WebLayers offers [policy manage solutions](#) that automate what has traditionally been a manual, labor-intensive process of defining and enforcing governance policies.

The Ready for IBM Rational mark indicates that WebLayers has validated its product against pre-established criteria that demonstrate value in the integration between its governance tools and the Rational platform.

"Our [governance products](#) are built with a comprehensive understanding of information, policies and l practices," says John Favazza, Vice President of Research and Development at WebLayers. "Our longstanding integration with RTC has allowed our customers to realize greater value and performanc from their software investments and we look forward to continuing that tradition with Version 3.0.1."

As WebLayers' solutions can be integrated into existing infrastructures and enforce policies throughou software development lifecycle, it allows for a seamless governance and guidance deployment.

"Rational Team Concert supports any plan, any process and any platform," says Michael Loria, vice president, IBM Rational Business Development. "With WebLayers, our mutual customers have the abi mix and match deployments to suit their particular environments."

WebLayers' integration with previous versions of RTC has benefitted Fortune 1000 customers by lowe total cost of ownership for software development efforts by using common and scalable infrastructure processes and security with open integrations and services. WebLayers' integrated solution expands existing RTC collaborations and processes, ensuring compliance to best practices and policies across t service lifecycle.

About WebLayers

WebLayers provides the industry's most comprehensive IT governance platform available today. By centralizing policy management across multiple IT domains, WebLayers substantially reduces the cost associated with governance. WebLayers also offers the largest collection of industry-proven policies, v speeds governance implementation and enforcement from design-time through deployment.
