

## IBM and WebLayers Present Software Collaboration Webinar

May 23, 2011

IBM and WebLayers Present Software Collaboration Webinar

CAMBRIDGE, MA -- (Marketwire) -- 05/23/11 -- WebLayers today announced a webinar presented in conjunction with IBM focused on software development and collaboration.

The webinar will address the benefits of WebLayers' automated governance technology coupled with IBM's Rational suite of software development tools.

The discussion will detail how the added value of governance is realized as it pertains to IBM's Rational technology, which is designed to transform how people work together to deliver greater value and performance from their software investments.

The webinar also will include a demonstration of WebLayers' integration with Rational Team Concert Beta v.3.0.1 showing the power of the solution through real life use case scenarios.

WHO: IBM and WebLayers, Inc.

WHAT: Live webinar and audience Q&A

WHEN: Tuesday, May 24th at 2:00 p.m. Eastern

AUDIENCE: Information technology architects, managers and CIOs

Registration is required to participate in the webinar. For more information, please visit the below registration link:

IBM and WebLayers Webinar

About WebLayers WebLayers is the leading provider of design-time SOA, Cloud, Mobile Application and Mainframe governance. WebLayers enables organizations to successfully design, develop and deploy enterprise services rapidly using out-of-the-box policy libraries and governors to ensure integration with third-party systems.

Relied upon by Fortune 1000 companies and government agencies, WebLayers provides visibility into software development processes and mitigates business risks that result from faulty software development practices.
