The Titan Corporation Chooses WebLayers to Provide DoD Program with Comprehensive SOA Governance Solution; WebLayers Center delivers critical governance for Net-centric Enterprise Service (NCES) initiative

CAMBRIDGE, Mass.--(BUSINESS WIRE)--Nov. 16, 2005--WebLayers and The Titan Corporation (NYSE: TTN) today announced that the Titan Corporation has selected WebLayers Governance technology and services to offer the United States Department of Defense a comprehensive program for governance of XML, Web Services and Service Oriented Architecture (SOA). The agreement is designed to meet a growing need in the Department of Defense community for enterprise Governance solutions, particularly as it pushes the NCES initiative forward. This initiative is the Defense Information System Agency's (DISD) key SOA implementation for the Department of Defense (DoD).

WebLayers, an innovative software company leading the market with solutions for governance of XML, Web Services, Outsourcing and Service Oriented Architecture (SOA), will license its WebLayers Center(TM) enterprise product family to Titan to enable the company to offer it through the many defense-related systems integration projects in which it is involved. Titan, a leading national security solutions provider, is closely involved with the DoD in a number of areas including enterprise information technology, homeland security, transformational programs, and various intelligence systems projects.

"Titan's reach into the defense community and its involvement in major programs provides WebLayers with an enormous opportunity," said Irwin Wallach, President and CEO, WebLayers. "More importantly, this partnership will get the industry's leading Governance solution into the hands of DoD Communities of Interest, which will ultimately help them in their efforts to ensure the transition to Net-centric operations."

"WebLayers is the only company today to offer an enterprise class Governance solution that can address the demanding requirements of the DoD market" said Martin Dowd, Vice President Strategic Engineering, The Titan Corporation, "By adding the WebLayers Center product, we can now offer the DoD an end-to-end Governance program that includes world-class product, integration, and support. This joint effort answers a growing need in the NCES program - that of advanced Governance of XML, Web Services and SOA."

WebLayers Center is the most comprehensive enterprise system available for Governance and Conformance of XML, Web Services, Outsourcing and SOA. It comprises three key elements of Governance: Automated enterprise-wide policy definition and management; active policy enforcement; and in-depth auditing . These together provide the continuous visibility, control and verification required for effective IT Governance.

About WebLayers

WebLayers (www.weblayers.com) is leading the market for policy-driven Governance for major application integration initiatives that include SOA, Outsourcing, and Large Scale System Integration (e.g. XML and Web Services). A private company founded in 2002 with venture capital backing, WebLayers is headquartered in Cambridge, Massachusetts. WebLayers Center(TM), the company's flagship product, is deployed within Fortune 500 companies and government agencies who are using it to define their enterprise policies, detect, analyze, and ensure conformance and to govern their application integration implementation. WebLayers Center's overall design is based on WebLayers' groundbreaking, patent-pending technology for policy-based Governance and conformance of XML and Web Services in a Service Oriented Architecture.

WebLayers is the founder and coordinator of The SOA Forum, an exclusive roundtable for Fortune 500 and Government enterprise architects and IT executives. Current members include over 170 senior IT executives and enterprise architects. For more information about the SOA Forum, see www.weblayers.com/theSOAforum.

WebLayers is also a member of AFEI (Association for Enterprise Integration), WS-I (Web Services Interoperability Organization), and OASIS (Organization for the Advancement of Structured Information Standards).
